Management's Discussion of Fund Performance

Market conditions and your Fund

For the first half of 2023, global equity markets continued to deliver gains amid continued interest rate increases, volatility and a banking crisis. The largest shock came in March 2023 as the failure of two US regional banks, Silicon Valley Bank and Signature Bank, along with the subsequent UBS takeover of Credit Suisse, led to a selloff in US and European financial stocks. Optimism about AI (Artificial Intelligence) boosted technology stocks during the second quarter of 2023. Emerging market equities also posted gains for the first half of 2023, although China's equities declined due to weaker-than-expected economic data, real estate developer debt issues and geopolitical concerns.

The global equity rally in the first half of 2023 came to an end in the third quarter as global equity markets declined. Concerns about a slowing global economy and interest rates staying "higher for longer" hampered stock returns. During the quarter, value stocks outperformed growth stocks. Energy was the best performing sector, ending the quarter in positive territory, boosted by rising oil prices as Russia and the Organization of Petroleum Exporting Countries (OPEC) cut

The Fund is permitted to temporarily carry a negative or overdrawn balance in its account with SSB, the custodian bank. Such balances, if any at period-end, are shown in the Statement of Assets and Liabilities under the payable caption *Amount due custodian*. To compensate the custodian bank for such overdrafts, the overdrawn Fund may either (1) leave funds as a compensating balance in the account so the custodian bank can be compensated by earning the additional interest; or (2) compensate by paying the custodian bank at a rate agreed upon by the custodian bank and Invesco, not to exceed the contractually agreed upon rate.
