

Prospectus

April 28, 2023

Series I shares and Series II shares

The Fund has characteristics unlike traditional investment products and is not suitable for all investors. Carefully read this prospectus before determining whether the Fund may be a suitable investment.

- The Fund seeks, over a specified annual outcome period (an “Outcome Period”), to provide investors with returns that match those of the Nasdaq-100 Index[®] (the “Underlying Index”) up to an upside cap, while providing a buffer against the first 10% (prior to taking into account any fees and expenses of the Fund) of Underlying Index losses. There is no guarantee that the Fund will successfully achieve its investment objective.
- As of the date of this prospectus, the Defined Outcomes sought by the Fund are based upon the performance of the Underlying Index over the Outcome Period of January 1, 2023 through December 31, 2023. Following this Outcome Period, each subsequent Outcome Period will be a one-year period from January 1 to December 31. The Fund is not intended to terminate after the end of any Outcome Period. After the end of each Outcome Period, another will begin.
- **Buffer:** For each Outcome Period, the Fund seeks to provide a buffer against the first 10% of Underlying Index losses over that Outcome Period (expressed as a percentage of the value of the Underlying Index determined at the start of the relevant Outcome Period), prior to taking account any fees and expenses of the Fund (the “Buffer”), which before Fund fees and expenses is 10% for Series I shares and 10% for Series II shares and after fees and expenses is 9.3% for Series I shares and 9.05% for Series II shares. The Fund, and therefore investors, will bear all Underlying Index losses over an Outcome Period exceeding 10%. There is no guarantee the Fund will successfully buffer against Underlying Index losses. The Buffer is designed to have its full effect only for investors who hold Fund shares for an entire Outcome Period.
- **Cap:** For each Outcome Period, Fund performance is subject to an upside return cap that represents the maximum percentage return (expressed as a percentage of the value of the Underlying Index determined at the start of the relevant Outcome Period), prior to taking into account any fees and expenses of the Fund (the “Cap”). The Fund’s current Cap is set at 24.60%, which before Fund fees and expenses is 24.60% for Series I shares and 24.60% for Series II shares and after fees and expenses is 23.73% for Series I shares and 23.42% for Series II shares. A new Cap level for each successive Outcome Period will be determined at the end of the trading day immediately preceding the first day of each new Outcome Period, based on market conditions and other factors. The market conditions and other factors that influence the Cap can include market volatility, risk free rates, and time to expiration. If the Underlying Index experiences returns over an Outcome Period in excess of the Cap, the Fund, and therefore investors, will not experience those excess gains.
- There is no guarantee that the Defined Outcomes for any Outcome Period will be realized. A shareholder may lose their entire investment.
- **The Fund’s Defined Outcomes may only be realized by holding shares on the first day of the Outcome Period and continuing to hold shares through to the last day of the Outcome Period. Accordingly, purchasing shares after the beginning of the Outcome Period may provide little or no ability to realize investment returns if the Fund’s net asset value has increased in value to a level near or above the Cap. In addition, if shares are purchased after the beginning of or redeemed before the end of the Outcome Period, there may be no effect of the Buffer and the result may be a loss of investment. If shares are purchased after the commencement of the Outcome Period or redeemed before the end of the Outcome Period, investment returns may vary significantly.**
- Even if shares are held for the entire Outcome Period, the Fund may not successfully achieve the Defined Outcomes, and there is no guarantee that the Buffer will limit Fund losses as intended or that participation up to the Cap will be achieved. The Buffer is not guaranteed and may not be achieved.
- Outcomes are Before Fees and Expenses: The Buffer and the Cap are calculated and expressed before giving effect to Fund fees and expenses. Thus, the maximum Fund performance over an Outcome Period is expected to be lower than the Cap by the amount of such fees and expenses, and Fund performance over an Outcome Period will be exposed to losses beyond the Buffer in the amount of such fees and expenses. The Fund’s prospectus includes further detail on Fund fees and expenses.
- A new Cap level for each successive Outcome Period will be determined at the end of the trading day immediately preceding the first day of each new Outcome Period. Each Outcome Period will have a new Cap which may be higher or lower than the current Cap. The Buffer for each Outcome Period will be 10%.
- The Fund’s website, [invesco.com/00901C400](https://www.invesco.com/00901C400), provides important Fund information on a daily basis, including information about the Cap and Buffer, current Outcome Period start and end dates, and information relating to the remaining potential

Fund Summary

Investment Objective(s)

The Fund seeks, over a specified annual outcome period, to provide investors with returns that match those of the Nasdaq-100 Index (the "Underlying Index") up to an upside cap, while providing a buffer against the first 10% (prior to taking into account any fees and expenses of the Fund) of Underlying Index losses.

Fees and Expenses of the Fund

This table describes the fees and expenses that are incurred, directly or indirectly, when a variable product owner buys, holds, or redeems interest in an insurance company separate account that invests in the Series I shares or Series II shares of the Fund but does not represent the effect of any fees or other expenses assessed in connection with your variable product, and if it did, expenses would be higher.

Shareholder Fees (fees paid directly from your investment)

	Series I shares	Series II shares
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of original purchase price or redemption proceeds, whichever is less)	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Series I shares	Series II shares
Management Fees	0.42%	0.42%
Distribution and/or Service (12b-1) Fees	None	0.25
Other Expenses	2.50	2.50
Acquired Fund Fees and Expenses	0.01	0.01
Total Annual Fund Operating Expenses	2.93	3.18
Fee Waiver and/or Expense Reimbursement ¹	2.22	2.22
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement	0.71	0.96

¹ Invesco Advisers, Inc. (Invesco or the Adviser) has contractually agreed to waive advisory fees and/or reimburse expenses to the extent necessary to limit Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement (excluding Acquired Fund Fees and Expenses and certain items discussed below) of Series I shares and Series II shares to 0.70% and 0.95%, respectively, of the Fund's average daily net assets (the "expense limits"). In determining the Adviser's obligation to waive advisory fees and/or reimburse expenses, the following expenses are not taken into account, and could cause the Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement to exceed the numbers reflected above: (i) interest; (ii) taxes; (iii) dividend expense on short sales; (iv) extraordinary or non-routine items, including litigation expenses; and (v) expenses that the Fund has incurred but did not actually pay because of an expense offset arrangement. Unless Invesco continues the fee waiver agreement, it will terminate on April 30, 2024. During its term, the fee waiver agreement cannot be terminated or amended to increase the expense limits without approval of the Board of Trustees.

Example. This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

This Example does not represent the effect of any fees or expenses assessed in connection with your variable product, and if it did, expenses would be higher.

The Example assumes that you invest \$10,000 in the Fund for the time

of the value of the Underlying Index determined at the start of the relevant Outcome Period (the "Underlying Index Start Value"), that can be achieved from an investment in the Fund over an Outcome Period, prior to taking into account any fees and expenses of the Fund. The Fund's Buffer represents the amount of losses, expressed as a percentage of the Underlying Index Start Value, that the Fund will buffer against if the Underlying Index experiences losses over an Outcome Period, prior to taking into account any fees and expenses of the Fund. Underlying Index losses over an Outcome Period that exceed the Buffer will be borne by shareholders.

Buffered Loss Risk. The term “buffer” is a generic term that is widely used in the investment management and financial services industries to describe an investment product or strategy that mitigates or alleviates

concentrating its investments in an industry or industry group, the Fund may face more risks than if it were diversified broadly over numerous industries or industry groups. Such industry-based risks, any of which may adversely affect the companies in the Underlying Index, may include, but are not limited to, the following: general economic conditions or cyclical market patterns that could negatively affect supply and demand in a particular industry; competition for resources; adverse labor relations; political or world events; obsolescence of technologies; and increased competition or new product introductions that may affect the profitability or viability of companies in an industry. In addition, at times, such industry or industry group may be out of favor and underperform other industries or the market as a whole.

Technology Sector Risk. Technology companies are subject to intense competition, rapid obsolescence of their products, issues with obtaining financing or regulatory approvals, product incompatibility, changing consumer preferences, increased government scrutiny, high required corporate capital expenditure for research and development or infrastructure and development of new products, each of which make the prices of securities issued by these companies more volatile. Technology companies are also heavily dependent on patent and other intellectual property rights, and the loss or impairment of these rights may adversely affect the company's profitability.

Non-Diversification Risk. Under the Investment Company Act of 1940 (1940 Act), a fund designated as "diversified" must limit its holdings such that the securities of issuers which individually represent more than 5% of its total assets must in the aggregate represent less than 25% of its total assets. The Fund is classified as "diversified" for purposes of the 1940 Act. However, the Fund may be "non-diversified," as defined in the 1940 Act, solely as a result of a change in relative market capitalization or index weighting of one or more constituents of the Underlying Index. A non-diversified fund can invest such that a greater portion of its assets are tied to the securities of a small number of issuers or any single issuer than a diversified fund can. In such circumstances, a change in the value of one or a few issuers' securities will therefore affect the value of the Fund more

caused by the return of the underlying index.

h

The Fund has characteristics unlike many other traditional investment products and is not appropriate for all investors. In particular, investment in the Fund may not be appropriate for investors who do not intend to maintain their investment through the entire Outcome Period. There is no guarantee that the Fund will be able to achieve the stated Defined Outcomes.

As of the date of this prospectus, the Defined Outcomes sought by the Fund are based upon the performance of the Underlying Index over the Outcome Period of January 1, 2023 through December 31, 2023. The Fund's current Cap is set at 24.60%. Following this Outcome Period, each subsequent Outcome Period will be a twelve-month period from January 1 to December 31. The Fund is not intended to terminate after the end of any Outcome Period. After the end of each Outcome Period, another will begin. A new Cap level for each successive Outcome Period will be determined at the end of the trading day immediately preceding the first day of each new Outcome Period. Although the Buffer for each Outcome Period will be 10% (prior to taking into account any Fund fees and expenses), the Cap level may rise or fall from one Outcome Period to the next. The Outcome Period start date and end date, the Underlying Index Start Value and the Cap for subsequent Outcome Periods will be disclosed in a supplement to the Fund's summary prospectus and prospectus on the Fund's website. **There is no guarantee that the Defined Outcome strategy for an Outcome Period will be realized.**

The Cap for each Outcome Period is set at the end of the trading day immediately preceding the first day of that Outcome Period, is expressed as a percentage of the Underlying Index Start Value, and represents the maximum return that can be achieved by investing in the Fund over the Outcome Period (prior to taking into account any fees and expenses of the Fund). The Cap level is based on market conditions and other factors. The market conditions and other factors that influence the Cap can include market volatility, risk free rates, and time to expiration. If the performance of the Underlying Index over the Outcome Period equals or exceeds the Cap, the Fund seeks to provide an investment return equal to the Cap (less Fund fees and expenses). If the Underlying Index performance is positive but less than the Cap, the Fund seeks to provide an investment return equal to the Underlying Index performance (less Fund fees and expenses).

The Buffer for each Outcome Period will be 10% and represents the amount of losses, expressed as a percentage of the Underlying Index Start Value, that the Fund seeks to protect investors from if the Underlying Index experiences losses over the Outcome Period (prior to taking into account any fees and expenses of the Fund). If the Underlying Index performance over an Outcome Period is negative and such losses over the Outcome Period are at or less than the Buffer, the Fund seeks to provide a return of 0%, less Fund fees and expenses. If the Underlying Index performance over an Outcome Period is negative and such losses exceed the Buffer, the Fund seeks to provide a loss that is less than the loss on the Underlying Index by the amount of the Buffer (less Fund fees and expenses). Stated differently, in this circumstance the Fund seeks to provide a return equal to the negative performance of the Underlying Index (less Fund fees and expenses) plus the Buffer. The Fund's Cap and Buffer amounts will, in effect, be reduced by the fees and expenses of the Fund.

The Fund's Defined Outcomes may only be realized by holding shares on the first day of the Outcome Period and continuing to hold shares through the last day of the Outcome Period. This means investors should hold or purchase shares prior to the beginning of the Outcome Period to achieve the intended results. The Fund's Defined Outcomes in respect of each Outcome Period are measured from the Fund's net asset value calculated at the end of the trading day immediately preceding the first day of that Outcome Period. Investors who purchase shares after the Outcome Period has begun or sell shares prior to the Outcome Period's conclusion may experience investment returns very different from those that the Fund seeks to provide. Investment returns may vary (in some cases substantially) from the returns

sought by the Fund's Defined Outcome strategy if shares are purchased after the beginning of the Outcome Period or redeemed before the conclusion of the Outcome Period. Even if shares are held for the entire Outcome Period, the Fund may not successfully achieve the Defined Outcomes, and there is no guarantee that the Buffer will limit Fund losses as intended or that participation up to the Cap will be achieved. The Buffer is not guaranteed and may not be achieved.

sought when the Fund crosses from diversified to non-diversified status due solely to a change in the relative market capitalization or index weighting of one or more constituents of the Underlying Index. As of April 1, 2023, the Underlying Index is non-diversified, and therefore as of that same date, the Fund is managed as non-diversified in accordance with the Underlying Index.

The Fund's investments in the types of securities and other investments described in this prospectus vary from time to time, and, at any time, the Fund may not be invested in all of the types of securities and other investments described in this prospectus. The Fund may also invest in securities and other investments not described in this prospectus.

For more information, see "Description of the Funds and Their Investments and Risks" in the Fund's SAI.

Risks

The principal risks of investing in the Fund are:

Market Risk. The market values of the Fund's investments, and therefore the value of the Fund's shares, will go up and down, sometimes rapidly or unpredictably. The value of the Underlying Index may be volatile, may go up or down due to general market conditions, such as real or perceived adverse economic conditions, changes in the general outlook for revenues or corporate earnings, changes in interest or currency rates or expectations about inflation, regional or global instability, or adverse investor sentiment generally. Individual stock prices tend to go up and down more dramatically than those of certain other types of investments, such as bonds. The value of the Underlying Index may also go up or down due to factors that affect an individual issuer or a particular industry or sector, such as changes in production costs and competitive conditions within an industry. In addition, natural or environmental disasters, widespread disease or other public health issues, war, military conflict, acts of terrorism, economic crisis or other events may have a significant impact on the value of the Underlying Index, as well as the financial markets and global economy generally. Such circumstances may impact the ability of the Adviser to effectively implement the Fund's investment strategy. The value of options contracts on the Underlying Index, which will constitute the substantial portion of the Fund's portfolio, may at times be more volatile than the Underlying Index itself. **Consequently, the value of the Fund's shares will be impacted by the price volatility of both the Underlying Index and options contracts on the Underlying Index.**

■ **Market Disruption Risks Related to Russia-Ukraine Conflict.**

Following Russia's invasion of Ukraine in late February 2022, various countries, including the United States, as well as North Atlantic Treaty Organization (NATO) member countries and the European Union, issued broad-ranging economic sanctions against Russia. The war in Ukraine (and the potential for further sanctions in response to Russia's continued military activity) may escalate. These and other corresponding events, have had, and could continue to have, severe negative effects on regional and global economic and financial markets, including increased volatility, reduced liquidity, and overall uncertainty. The negative impacts may be particularly acute in certain sectors including, but not limited to, energy and financials. Russia may take additional countermeasures or retaliatory actions (including cyberattacks), which could exacerbate negative consequences on global financial markets. The duration of the conflict and corresponding sanctions and related events cannot be predicted. The foregoing may result in a negative impact on Fund performance and the value of an investment in the Fund, even beyond any direct investment exposure the Fund may have to Russian issuers or the adjoining geographic regions.

■ **COVID-19.** The "COVID-19" strain of coronavirus has resulted in instances of market closures and dislocations, extreme volatility, liquidity constraints and increased trading costs. Efforts to contain its spread have resulted in travel restrictions, disruptions of healthcare systems, business operations (including business closures) and

supply chains, layoffs, lower consumer demand and employee availability, and defaults and credit downgrades, among other significant economic impacts that have disrupted global economic activity across many industries. Such economic impacts may exacerbate other pre-existing political, social and economic risks locally or globally and cause general concern and uncertainty. The full economic impact and ongoing effects of COVID-19 (or other future epidemics or pandemics) at the macro-level and on individual businesses are unpredictable and may result in significant and prolonged effects on the Fund's performance.

Buffered Loss Risk. The term "buffer" is a generic term that is widely used in the investment management and financial services industries to describe an investment product or strategy that mitigates or alleviates downside risk and, typically, caps returns on the upside. The Buffer here is designed to limit downside losses for shares purchased at the beginning and held until the end of the Outcome Period; however, there is no guarantee that the Fund will be successful in implementing its stated Buffer strategy in an Outcome Period or that the Buffer will effectively protect against any or all losses. If the Underlying Index declines over an Outcome Period by more than the Buffer, shareholders will bear the amount of the loss in excess of the Buffer at the end of the Outcome Period (plus Fund fees and expenses). **In addition, if shares are purchased after the beginning of or redeemed before the end of the Outcome Period, there may be no effect of the Buffer and the result may be a loss of investment.** If an investor purchases shares of the Fund during an Outcome Period after the Underlying Index's value has decreased, the investor may receive less, or none, of the intended benefit of the Buffer. The Fund does not provide principal protection or protection of gains and shareholders could experience significant losses, including loss of their entire investment. The Fund's Buffer as part of its Defined Outcome strategy may not be successful in limiting losses.

Capped Return Risk. If the Underlying Index experiences returns over the Outcome Period in excess of the Cap, the Fund will not participate in such returns beyond the Cap. In this way, the Fund is unlike other investment companies that seek to replicate the performance of the Underlying Index in all cases. If shares are purchased after the beginning of the Outcome Period, and the Fund's net asset value has already achieved returns at or near the Cap, there may be no ability to experience any return on investment, but such purchaser remains vulnerable to risk of loss. **In this circumstance, you should not buy shares of the Fund.**

Additionally, the Fund's Defined Outcome strategy may not be successful in replicating the returns (before Fund fees and expenses) of the Underlying Index up to the level of the Cap.

Cap Level Change Risk. At the end of the trading day immediately preceding the first day of each Outcome Period, a new Cap is established, depending on the market conditions and the prices for options contracts on the Underlying Index at the time. Therefore, the level of the Cap may rise or fall for subsequent Outcome Periods and is unlikely to remain the same. If the Caps for future Outcome Periods of the Fund were to decrease, shareholders in the Fund would have less opportunity to participate in any future positive returns of the Underlying Index.

Outcome Period Risk. The Fund's Defined Outcome strategy seeks to replicate the performance of the Underlying Index (prior to taking into account fees and expenses of the Fund) over the Outcome Period, subject to the Cap and Buffer, solely if shares are purchased on the first day of the Outcome Period and held until the last day of the Outcome Period. This means investors should hold or purchase shares prior to the beginning of the Outcome Period to achieve the intended results. **If shares are purchased after the commencement of the Outcome Period or redeemed before the end of the Outcome Period, investment returns may vary significantly.** Shares purchased after the Outcome Period begins may provide little or no ability to realize investment returns if the Fund's net asset value has increased in value to a level near or above the Cap but will still be subject to the risk of loss. If shares are purchased

after the Outcome Period begins and the Fund's net asset value has decreased to the Buffer level, there is no effective Buffer against further losses when purchasing at that time. If shares are purchased after the Outcome Period begins and the Fund's net asset value has increased, the Buffer will not protect against subsequent losses unless the Fund's net asset value decreases to its value at the start of the Outcome Period. Additionally, if the Outcome Period has begun and the Fund's net asset value has decreased since the start of the Outcome Period, a purchaser of shares of the Fund at that price may realize an investment return that is less than any subsequent positive return of the Underlying Index.

Derivatives Risk.

Options, the liquidation of a large number of options may more significantly impact the price. A less liquid trading market may adversely impact the value of the Flex Options held by the Fund and the value of your investment.

Non-Indexing Risk. Unlike many investment companies, the Fund does not utilize an investing strategy that seeks returns that correspond to the returns of the Underlying Index in all cases. The operation of the Cap and the Buffer are designed to provide holders of shares of the Fund over an Outcome Period with an investment return that differs from the return of the Underlying Index if the performance of the Underlying Index exceeds the Cap or is negative. Additionally, a shareholder who redeems shares before the conclusion of an Outcome Period is unlikely to realize returns that correspond to the performance of the Underlying Index since the start of the Outcome Period. **If you desire to achieve an investment return that equals the return on the Underlying Index in all cases, you should not buy shares of the Fund.**

Industry Concentration Risk. In following its methodology, the Underlying Index from time to time may be concentrated to a significant degree in securities of issuers operating in a single industry or group of industries. To the extent that the Underlying Index concentrates in the securities of issuers in a particular industry or group of industries, the Fund will also concentrate its investments to approximately the same extent. By concentrating its investments in an industry or group of industries, the Fund may face more risks than if it were diversified broadly over numerous industries or groups of industries. Such industry-based risks, any of which may adversely affect the companies in the Underlying Index, may include, but are not limited to legislative or regulatory changes, adverse market conditions and/or increased competition within the industry or group of industries. In addition, at times, such industry or group of industries may be out of favor and underperform other industries, groups of industries or the market as a whole.

Technology Sector Risk. Technology companies are subject to intense competition and their products are at risk of rapid obsolescence, which make the prices of securities issued by these companies particularly volatile. Product obsolescence can result from rapid technological developments, frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. Factors that may also significantly affect the market value of securities of issuers in the technology sector include the failure to obtain, or delays in obtaining, financing or regulatory approvals, product incompatibility, changing consumer preferences, increased government scrutiny, high required corporate capital expenditure for research and development or infrastructure and development of new products. Technology companies are also heavily dependent on patent and other intellectual property rights, and the loss or impairment of these rights may adversely affect the company's profitability.

Non-Diversification Risk. Under the 1940 Act, a fund designated as "diversified" must limit its holdings such that the securities of issuers which individually represent more than 5% of its total assets must in the aggregate represent less than 25% of its total assets. The Fund is classified as "diversified" for purposes of the 1940 Act. However, in seeking to track its Underlying Index, the Fund may be "non-diversified," as defined in the 1940 Act, solely as a result of a change in relative market capitalization or index weighting of one or more constituents of the Underlying Index. A non-diversified fund can invest such that a greater portion of its assets are tied to the obligations or securities of a small number of issuers or any single issuer than a diversified fund can. In such circumstances, a change in the value of one or a few issuers' securities will therefore affect the value of the Fund more than if it was a diversified fund.

Non-Correlation Risk. The Fund's returns may not match the returns of the Underlying Index (that is, it may experience tracking error) for a number of reasons. In addition to the impact of the Cap and the Buffer on the Fund's returns as compared to the returns of the Underlying Index, the Fund incurs operating expenses not applicable to the Underlying Index. To the extent that the Fund has recently commenced operations and/or otherwise has a relatively small amount of assets, such operating expenses

could have a proportionally greater impact on the Fund. Additionally, subscription and redemption activity in the Fund may cause the Fund to experience tracking error. Investors purchasing or redeeming shares of the Fund will transact at the net asset value per share of the relevant Series of shares next computed after the Fund receives that investor's order. However, the Fund generally will not purchase or sell the relevant options contracts referencing the Underlying Index in response to investor subscriptions and redemptions on a particular business day until after the investor orders are received, and the price of those options contracts may have changed (potentially substantially) in the intervening period since the net asset value of the Fund's shares was last determined. The potential for such tracking error is greater when subscription and redemption activity in the Fund is relatively higher and/or during periods that the value of the Underlying Index or options contracts thereon are experiencing relatively higher volatility. The Fund's net asset value will be principally composed of options contracts on the Underlying Index, the value of which is derived not only from the performance of the Underlying Index but also from the time remaining until expiration, the price volatility of the Underlying Index and general interest rate conditions. Consequently, the Fund's net asset value will not directly correlate on a day-to-day basis with the returns experienced by the Underlying Index.

The performance of the Fund and the Underlying Index also may vary due to asset valuation differences and because the Fund may fair value certain of the investments it holds. To the extent the Fund calculates its NAV based on fair value prices, the Fund's ability to track the Underlying Index may be adversely affected.

The Adviser may not fully invest the Fund's assets at times, either as a result of cash flows into the Fund, to retain a reserve of cash to meet redemptions and expenses, or because of low assets.

Operational Risk. The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund and its Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Redemption Risk. In some instances, an insurance company through which the Fund is available may restrict its contract owners from purchasing the Fund's shares after an Outcome Period has already commenced. Nevertheless, existing Fund shareholders are legally permitted to redeem shares they already hold throughout the Outcome Period on any trading day, as described in the applicable variable insurance contract prospectus. Such redemptions may increase the Fund's transaction costs and could cause the Fund's operating expenses to be allocated over a smaller asset base, leading to an increase in the Fund's expense ratio. If shareholders redeem large amounts of shares rapidly or unexpectedly, the Fund may have to sell portfolio securities at times when it would not otherwise do so, which could negatively impact the Fund's net asset value and liquidity and its ability to achieve the Defined Outcome strategy.

Valuation Risk. During periods of reduced market liquidity or in the absence of readily available market quotations, the ability of the Fund to value the Flex Options it holds becomes more difficult and the judgment of the Fund's Adviser (employing the valuation policy adopted by the Board of Trustees of the Trust and related procedures) may play a greater role in the valuation of the Fund's holdings due to reduced availability of reliable, objective pricing data. Consequently, while such determinations will be made in good faith, it may nevertheless be more difficult for the Fund to accurately assign a daily value.

Portfolio Holdings

A description of Fund policies and procedures with respect to the disclosure of Fund portfolio holdings is available in the SAI, which is available at www.invesco.com/us.

Fund Management

The Adviser(s)

Invesco serves as the Fund's investment adviser. The Adviser manages the investment operations of the Fund as well as other investment portfolios that encompass a broad range of investment objectives, and has agreed to perform or arrange for the performance of the Fund's day-to-day management. The Adviser is located at 1331 Spring Street, N.W., Suite 2500, Atlanta, Georgia 30309. The Adviser, as successor in interest to multiple investment advisers, has been an investment adviser since 1976.

Invesco Asset Management Limited (Invesco Asset Management) Serves as the Fund's investment sub-adviser. Invesco Asset Management, an affiliate of the Adviser, is located at Perpetual Park, Perpetual Park Drive, Henley-on-Thames, Oxfordshire, RG9 1HH, United Kingdom. Invesco Asset Management has been managing assets on behalf of consumers, institutional clients and institutional professionals through a broad product range, including investment companies with variable capital, investment trusts, individual savings accounts, pension funds, offshore funds and other specialist mandates since 1969, the year Invesco Asset Management was incorporated. Invesco Asset Management provides portfolio management services to the Fund.

In addition, Invesco has entered into one or more Sub-Advisory Agreements with certain affiliates to serve as sub-advisers to the Fund (the Sub-Advisers). Invesco may appoint the Sub-Advisers from time to time to provide discretionary investment management services, investment advice, and/or order execution services to the Fund. The Sub-Advisers and the Sub-Advisory Agreements are described in the SAI.

Exclusion of Adviser from Commodity Pool Operator Definition

With respect to the Fund, the Adviser has claimed an exclusion from the definition of "commodity pool operator" (CPO) under the Commodity Exchange Act (CEA) and the rules of the Commodity Futures Trading Commission (CFTC) and, therefore, is not subject to CFTC registration or regulation as a CPO. In addition, the Adviser is relying upon a related exclusion from the definition of "commodity trading advisor" (CTA) under the CEA and the rules of the CFTC with respect to the Fund.

The terms of the CPO exclusion require the Fund, among other things, to adhere to certain limits on its investments in "commodity interests." Commodity interests include commodity futures, commodity options and swaps, which in turn include non-deliverable forwards. The Fund is permitted to invest in these instruments as further described in the Fund's SAI. However, the Fund is not intended as a vehicle for trading in the commodity futures, commodity options or swaps markets. The CFTC has neither reviewed nor approved the Adviser's reliance on these exclusions, or the Fund, its investment strategies or this prospectus.

Adviser Compensation

During the fiscal year ended December 31, 2022, the Adviser did not receive any compensation from the Fund, after fee waiver and/or expense reimbursement, if any.

Invesco, not the Fund, pays sub-advisory fees, if any.

A discussion regarding the basis for the Board's approval of the investment advisory agreement and investment sub-advisory agreements of the Fund is available in the Fund's most recent annual or semi-annual report to shareholders.

Portfolio Managers

Investment management decisions for the Fund are made by the investment management teams at Invesco and Invesco Asset Management.

The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

- John Burrello, CFA, Portfolio Manager, who has been responsible for the Fund since 2023 and has been associated with Invesco and/or its affiliates since 2012.

- Ali Zouiten, Portfolio Manager, who has been responsible for the Fund since 2021 and has been associated with Invesco Asset Management and/or its affiliates since 2019. From 2017 to 2019, he was associated with HSBC Asset Management where he served as Head of Investments for Product Development. From 2011 to 2019, he was associated with Baloise Group in Switzerland, where he served as Specialist for Hedging and Financial Structures.

More information on the portfolio managers may be found at www.invesco.com/us. The website is not part of this prospectus.

The Fund's SAI provides additional information about the portfolio managers' investments in the Fund, a description of the compensation structure and information regarding other accounts managed.

Other Information

Purchase and Redemption of Shares

The Fund ordinarily effects orders to purchase and redeem shares at the Fund's next computed net asset value (NAV) after it receives an order. Insurance companies participating in the Fund serve as the Fund's designee for receiving orders of separate accounts that invest in the Fund. The Fund may postpone the right of redemption only under unusual circumstances, as allowed by the SEC, such as when the New York Stock Exchange (NYSE) restricts or suspends trading.

Although the Fund generally intends to pay redemption proceeds solely in cash, the Fund reserves the right to determine, in its sole discretion, whether to satisfy redemption requests by making payment in securities or other property (known as a redemption in kind). Redemptions in kind may result in transaction costs and/or market fluctuations associated with liquidating or holding the securities, respectively.

Shares of the Fund are offered in connection with mixed and shared funding, i.e., to separate accounts of affiliated and unaffiliated insurance companies funding variable products. The Fund currently offers shares only to insurance company separate accounts and funds of funds. In the future, the Fund may offer them to pension and retirement plans that qualify for special federal income tax treatment. Due to differences in tax treatment and other considerations, the interests of Fund shareholders, including variable product owners and plan participants investing in the Fund (whether directly or indirectly through fund of funds), may conflict.

Mixed and shared funding may present certain conflicts of interest. For example, violation of the federal tax laws by one insurance company separate account investing directly or indirectly in a fund could cause variable products funded through another insurance company separate account to lose their tax-deferred status, unless remedial actions were taken. The Board will monitor for the existence of any material conflicts and determine what action, if any, should be taken. The Fund's NAV could decrease if it had to sell investment securities to pay redemption proceeds to a separate account (or plan) withdrawing because of a conflict.

Redemptions by Large Shareholders

At times, the Fund may experience adverse effects when certain large shareholders redeem large amounts of shares of the Fund. Large shareholders may have certain rights or preferences that could affect the Fund's operations.

Excessive Short-Term Trading Activity Disclosure

The Fund's investment programs are designed to serve long-term investors and are not designed to accommodate excessive short-term trading activity in violation of the Fund's policies and procedures described below.

Excessive short-term trading activity in the Fund's shares (i.e., purchases of Fund shares followed shortly thereafter by redemptions of such shares, or vice versa) may hurt the long-term performance of the Fund by requiring it to maintain an excessive amount of cash or to liquidate portfolio holdings at a disadvantageous time, thus interfering with the efficient management of the Fund by causing it to incur increased brokerage and administrative costs. Where excessive short-term trading activity seeks to take advantage of arbitrage opportunities from stale prices for portfolio securities, the value of Fund shares held by long-term investors may be diluted. The Board has adopted policies and procedures designed to discourage excessive short-term trading of Fund shares. The Fund may alter its policies and procedures at any time without giving prior notice to Fund shareholders if Invesco believes the change would be in the best interests of long-term investors.

Pursuant to the Fund's policies and procedures, Invesco and certain of its corporate affiliates (Invesco and such affiliates, collectively, the Invesco Affiliates) currently use the following tools designed to discourage excessive short-term trading in the Fund:

- (1) trade activity monitoring; and
- (2) the use of fair value pricing consistent with the valuation policy approved by the Board and related procedures.

Each of these tools is described in more detail below.

In addition, restrictions designed to discourage or curtail excessive short-term trading activity may be imposed by the insurance companies and/or their separate accounts that invest in the Fund on behalf of variable product owners. Variable product owners should refer to the applicable contract and related prospectus for more details.

Trade Activity Monitoring

To detect excessive short-term trading activities, the Invesco and certain of

Capital Gains Distributions

The Fund generally distributes long-term and short-term capital gains (net of any available capital loss carryovers), if any, at least annually. Capital gains distributions may vary considerably from year to year as a result of the Fund's normal investment activities and cash flows.

Share Classes

The Fund has two classes of shares, Series I shares and Series II shares. Each class is identical except that Series II shares have a distribution or "Rule 12b-1 Plan" that is described below.

Distribution Plan

The Fund has adopted a distribution or "Rule 12b-1 Plan" for its Series II shares. The plan allows the Fund to pay distribution fees to life insurance companies and others to promote the sale and distribution of Series II shares. The plan provides for a maximum fee equal to an annual rate of 0.25% (expressed as a percentage of average daily net assets of the Fund). Because the Fund pays these fees out of its assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of charges.

Payments to Insurance Companies

The insurance company that issued your variable product, or one of its affiliates, may receive all the Rule 12b-1 distribution fees discussed above. In addition to those payments, Invesco Distributors, Inc., the distributor of the Fund and an Invesco Affiliate, and other Invesco Affiliates may make cash payments to the insurance company that issued your variable product or the insurance company's affiliates in connection with promotion of the Fund and certain other marketing support services. Invesco Affiliates make these payments from their own resources. Invesco Affiliates make these payments as incentives to certain insurance companies or their affiliates to promote the sale and retention of shares of the Fund. The benefits Invesco Affiliates receive when they make these payments may include, among other things, adding the Fund to the list of underlying investment options in the insurance company's variable products, and access (in some cases on a preferential basis over other competitors) to individual members of an insurance company's sales force or to an insurance company's management. These payments are sometimes referred to as "shelf space" payments because the payments compensate the insurance company for including the Fund in its variable products (on its "sales shelf"). Invesco Affiliates may also make payments to insurance company affiliates for support, training and ongoing education for sales personnel about the Fund, financial planning needs of Fund shareholders or contract owners that allocate contract value directly or indirectly to the Fund, marketing and advertising of the Fund, and access to periodic conferences held by insurance company affiliates relating directly or indirectly to the Fund. Invesco Affiliates compensate insurance companies or their affiliates differently depending typically on the Fund's position for sales personnel at the insurance company or its affiliates.

Invesco Affiliates compensate insurance companies or their affiliates differently depending typically on the Fund's position for sales personnel at the insurance company or its affiliates.

Invesco Affiliates compensate insurance companies or their affiliates differently depending typically on the Fund's position for sales personnel at the insurance company or its affiliates.

Financial Highlights

The financial highlights show the Fund's financial history for the past five fiscal years or, if shorter, the period of operations of the Fund or any of its share classes. The financial highlights table is intended to help you understand the Fund's financial performance. Certain information reflects financial results for a single Fund share.

The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions).

This information has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, whose report, along with the Fund's financial statements, is included in the Fund's annual report, which is available upon request.

	Net asset value, beginning of period	Net investment income (loss) ^(a)	Net gains (losses) on securities (both realized and unrealized)	Total from investment operations	Net asset value, end of period	Total return ^(b)	Net assets, end of period (000's omitted)	Ratio of expenses to average net assets with fee waivers and/or expenses absorbed	Ratio of expenses to average net assets without fee waivers and/or expenses absorbed	Ratio of net investment income (loss) to average net assets	Portfolio turnover ^(c)

(a) Calculated using average shares outstanding.

(b) Includes adjustments in accordance with accounting principles generally accepted in the United States of America and as such, the net asset value for financial reporting purposes and the returns based upon those net asset values may differ from the net asset value and returns for shareholder transactions. Total returns are not annualized for periods less than one year, if applicable, and do not reflect charges assessed in connection with a variable product, which if included would reduce total returns.

(c) Portfolio turnover is calculated at the fund level and is not annualized for periods less than one year, if applicable.

(d) Commencement date of December 31, 2021.

(e) Annualized.

Obtaining Additional Information

More information may be obtained free of charge upon request. The SAI, a current version of which is on file with the SEC, contains more details about the Fund and is incorporated by reference into this prospectus (is legally a part of this prospectus). Annual and semi-annual reports to shareholders contain additional information about the Fund's investments. The Fund's annual report also discusses the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year. The Fund also files its complete schedule of portfolio holdings with the SEC for the 1st and 3rd quarters of each fiscal year as an exhibit to its reports on Form N-PORT. The Fund's most recent portfolio holdings, as filed on Form N-PORT, will also be made available to insurance companies issuing variable products that invest in the Fund.

If you have questions about an Invesco Fund, or you wish to obtain a free copy of the Fund's current SAI, annual or semi-annual reports, or Form N-PORT, please contact the insurance company that issued your variable product, or you may contact us.
