

## Invesco<sup>®</sup> V.I. Nasdaq 100 Buffer Fund - September

**Shares of the Fund are currently offered only to insurance company separate accounts funding variable annuity contracts and variable life insurance policies.**

As with all other mutual fund securities, the U.S. Securities and Exchange Commission (SEC) has not approved or disapproved these securities or passed upon the adequacy of this prospectus. Any representation to the contrary is a criminal offense.

An investment in the Fund:

- is not FDIC insured;
- may lose value; and
- is not guaranteed by a bank.

The Fund has characteristics unlike traditional investment products and is not suitable for all investors. Carefully read this prospectus before determining whether the Fund may be a suitable investment.

- The Fund seeks, over a specified annual outcome period (an "Outcome Period"), to provide investors with returns that match those of the Nasdaq-100 Index<sup>®</sup> (the "Underlying Index") up to an upside cap, while providing a buffer against the first 10% (prior to taking into account any fees and expenses of the Fund) of Underlying Index losses. There is no guarantee that the Fund will successfully achieve its investment objective.
- As of the date of this prospectus, the Defined Outcomes sought by the Fund are based upon the performance of the Underlying Index over the Outcome Period of October 1, 2022 through September 30, 2023. Following this Outcome Period, each subsequent Outcome Period will be a one-year period from October 1 to September 30. The Fund is not intended to terminate after the end of any Outcome Period. After the end of each Outcome Period, another will begin.
- **Buffer** For each Outcome Period, the Fund seeks to provide a buffer against the first 10% of Underlying Index losses over that Outcome Period (expressed as a percentage of the value of the Underlying Index determined at the start of the relevant Outcome Period), prior to taking account any fees and expenses of the Fund (the "Buffer"), which before Fund fees and expenses is 10% for Series I shares and 10% for Series II shares and after fees and expenses is 9.3% for Series I shares and 9.05% for Series II shares. The Fund, and therefore investors, will bear all Underlying Index losses over an Outcome Period exceeding 10%. There is no guarantee the Fund will successfully buffer against Underlying Index losses. The Buffer is designed to have its full effect only for investors who hold Fund shares for an entire Outcome Period.
- **Cap** For each Outcome Period, Fund performance is subject to an upside return cap that represents the maximum percentage return (expressed as a percentage of the value of the Underlying Index determined at the start of the relevant Outcome Period), prior to taking into account any fees and expenses of the Fund (the "Cap"). The Fund's current Cap is set at 26.70%, which before Fund fees and expenses is 26.70% for Series I shares and 26.70% for Series II shares and after fees and expenses is 25.81% for Series I shares and 25.50% for Series II shares. A new Cap level for each successive Outcome Period will be determined at the end of the trading day immediately preceding the first day of each new Outcome Period, based on market conditions and other factors. The market conditions and other factors that influence the Cap can include market volatility as a percentage of the

Shares of the Fund are used as investment vehicles for variable annuity contracts and variable life insurance policies (variable products) issued by certain insurance companies, and funds of funds. You cannot purchase shares of the Fund directly. As an owner of a variable product (variable product owner) that offers the Fund as an investment option,

however, you may allocate your variable product values to a separate account of the insurance company that invests in shares of the Fund.

Your variable product is offered through its own prospectus, which contains information about your variable product, including how to purchase the variable product and how to allocate variable product values to the Fund.

# Fund Summary

## Investment Objective(s)

The Fund seeks, over a specified annual outcome period, to provide investors with returns that match those of the Nasdaq-100 Index (the "Underlying Index") up to an upside cap, while providing a buffer against the first 10% (prior to taking into account any fees and expenses of the Fund) of Underlying Index losses.

## Fees and Expenses of the Fund

This table describes the fees and expenses that are incurred, directly or indirectly, when a variable product owner buys, holds, or redeems interest in an insurance company separate account that invests in the Series I shares or Series II shares of the Fund but does not represent the effect of any fees or other expenses assessed in connection with your variable product, and if it did, expenses would be higher.

### Shareholder Fees (fees paid directly from your investment)

	Series I shares	Series II shares
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of original purchase price or redemption proceeds, whichever is less)	None	None

### Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Series I shares	Series II shares
Management Fees	0.42%	0.42%
Distribution and/or Service (12b-1) Fees	None	0.25
Other Expenses	2.47	2.47
Acquired Fund Fees and Expenses	0.01	0.01
Total Annual Fund Operating Expenses	2.90	3.15
Fee Waiver and/or Expense Reimbursement <sup>1</sup>	2.19	2.19
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement	0.71	0.96

<sup>1</sup> Invesco Advisers, Inc. (Invesco or the Adviser) has contractually agreed to waive advisory fees and/or reimburse expenses to the extent necessary to limit Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement (excluding Acquired Fund Fees and Expenses and certain items discussed below) of Series I shares and Series II shares to 0.70% and 0.95%, respectively, of the Fund's average daily net assets (the "expense limits"). In determining the Adviser's obligation to waive advisory fees and/or reimburse expenses, the following expenses are not taken into account, and could cause the Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement to exceed the numbers reflected above: (i) interest; (ii) taxes; (iii) dividend expense on short sales; (iv) extraordinary or non-routine items, including litigation expenses; and (v) expenses that the Fund has incurred but did not actually pay because of an expense offset arrangement. Unless Invesco continues the fee waiver agreement, it will terminate on April 30, 2024. During its term, the fee waiver agreement cannot be terminated or amended to increase the expense limits without approval of the Board of Trustees.

**Example.** This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

This Example does not represent the effect of any fees or expenses assessed in connection with your variable product, and if it did, expenses would be higher.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain equal to the Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement in the first year and the Total Annual Fund Operating Expenses thereafter.

Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	1 Year	3 Years	5 Years	10 Years
Series I shares	\$73	\$690	\$1,334	\$3,066
Series II shares	\$98	\$766	\$1,458	\$3,305

**Portfolio Turnover** The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 0% of the average value of its portfolio.

## Principal Investment Strategies of the Fund

The Fund invests, under normal circumstances, at least 80% of its net assets (plus any borrowings for investment purposes) in options that reference the Underlying Index or options that reference the Invesco QQQ<sup>®</sup> Trust, which is an exchange-traded unit investment trust that seeks to track the Nasdaq-100 Index (the "Underlying Fund"). References throughout this Prospectus to options that reference the "Underlying Index" mean either the Underlying Index or the Underlying Fund unless otherwise indicated. The Underlying Index includes securities of 100 of the largest domestic and international non-financial companies listed on The Nasdaq Stock Market LLC based on market capitalization. The options used by the Fund will include conventional, exchange-traded (listed) put and call options on the Underlying Index and Flexible Exchange Options ("Flex Options"), which are customizable options contracts. An option is a contract that gives the purchaser of the option, in return for the premium paid, the right, but not the obligation, to buy from (in the case of a call option) or sell to (in the case of a put option) the writer of the option at the exercise price during the term of the option (for American style options) or on a specified date (for European style options), the security, currency or other instrument underlying the option (or to receive payment of a cash settlement amount, in the case of cash-settled options, such as index options). Both the conventional, listed put and call options and the Flex Options on the Underlying Index purchased and sold by the Fund are cleared by the Options Clearing Corporation ("OCC"), a market clearinghouse, through a clearing member selected by the Fund. Flex Options allow the Fund to specify key contract terms, including exercise prices and expiration dates, that are not available for contracts traded in the conventional, listed options market. Flex Options purchased and sold by the Fund are set to expire on the last day of the Outcome Period, at which time the Fund will invest in a new set of Flex Options for the next Outcome Period.

The Underlying Index is a price return index, which captures only the capital appreciation or depreciation component of the issuers included in the Underlying Index and not any associated dividend payments paid by those issuers. The Fund, and therefore investors in the Fund, will not receive the benefit of such dividends.

The Fund employs a "Defined Outcome" strategy, which seeks to replicate the performance of the Underlying Index over a designated period of one year (the "Outcome Period") up to a predetermined cap (the "Cap"), while providing a buffer against the first 10% of Underlying Index losses over the Outcome Period (the "Buffer"). Following the conclusion of the Outcome Period, each subsequent Outcome Period will be a one-year period that begins on the trading day that immediately follows the day that the preceding Outcome Period concluded. A new Cap level will be determined at the end of the trading day immediately preceding the first day of each new Outcome Period and will change depending on market conditions. The Buffer for each Outcome Period will be 10%. The Fund's Cap represents the maximum percentage return, expressed as a percentage

of the value of the Underlying Index determined at the start of the Outcome Period (the "Underlying Index Start Value"), that can be achieved over an Outcome Period has begun or sell shares prior to the Outcome Period, prior to taking into account any fees and expenses of the Fund. The Fund's Buffer requirement is that the amount of losses, expressed as a percentage of the Underlying Index Start Value, that the Fund will buffer against if the Underlying Index experiences losses over an Outcome Period, prior to taking into account any fees and expenses of the Fund. Underlying Index losses over an Outcome Period that exceed the Buffer will be borne by shareholders. As a result, you should expect that, if the Nasdaq-100 Index experiences losses of more than 10% over the relevant Outcome Period, you will bear all such losses on a one-to-one basis.

The Fund has characteristics unlike many other traditional investment products and is not appropriate for all investors. In particular, investment in the Fund may not be appropriate for investors who do not intend to maintain their investment through the entire Outcome Period. There is no guarantee that the Fund will be able to achieve the stated Defined Outcomes.

As of the date of this prospectus, the Defined Outcomes sought by the Fund are based upon the performance of the Underlying Index over the Outcome Period of October 1, 2022 through September 30, 2023. The Fund's current Cap is set at 26.70%. Following this Outcome Period, each subsequent Outcome Period will be a twelve-month period from October 1 to September 30. The Fund is not intended to terminate after the end of an Outcome Period. After the end of each Outcome Period, another Outcome Period will be determined at the end of the trading day immediately preceding the first day of each new Outcome Period. Although the Buffer for each Outcome Period will be 10% (prior to taking into account any Fund fees and expenses), the Cap level may rise or fall from one Outcome Period to the next. The Outcome Period date and end date, the Underlying Index Start Value and the Cap for subsequent Outcome Periods will be disclosed in a supplement to the Fund's summary prospectus and prospectus on the Fund's website.

For each Outcome Period, the Fund seeks to provide a buffer against the first 10% of Underlying Index losses over that Outcome Period (expressed as a percentage of the relevant Underlying Index Start Value), prior to taking into account any fees and expenses of the Fund, which after Fund fees and expenses is 9.3% for Series I shares and 9.05% for Series II shares. The Fund, and therefore investors, will bear all Underlying Index losses over an Outcome Period exceeding 10%. There is no guarantee the Fund will successfully buffer against Underlying Index losses. The Buffer is designed to have its full effect only for investors who hold Fund shares for an entire Outcome Period.

For each Outcome Period, Fund performance is subject to an upside return cap that represents the maximum percentage return (expressed as a percentage of the relevant Underlying Index Start Value), prior to taking into account any fees and expenses of the Fund. The Fund's current Cap is set at 26.70%, which after Fund expenses is 25.81% for Series I shares and 25.50% for Series II shares. A new Cap level for each successive Outcome Period will be determined at the end of the trading day immediately preceding the first day of each new Outcome Period, based on market conditions and other factors. The market conditions and other factors that influence the Cap can include market volatility, risk free rates, and time to expiration. If the Underlying Index experiences returns over an Outcome Period in excess of the Cap, the Fund, and therefore investors, will not experience those excess gains.

The Fund's Defined Outcomes may only be realized by holding shares on the first day of the Outcome Period and continuing to hold shares through the last day of the Outcome Period. The Fund's Defined Outcomes in respect of each Outcome Period are measured from the Fund's net asset value calculated at the end of the trading day immediately preceding the first day of that

Outcome Period. Investors who purchase shares after the Outcome Period has begun or sell shares prior to the Outcome Period may experience investment returns very different from those that the Fund seeks to provide. Investment returns may vary (in some cases substantially) from the returns sought by the Fund's Defined Outcome strategy if shares are purchased after the beginning of the Outcome Period or redeemed before the conclusion of the Outcome Period. Purchasing shares after the beginning of the Outcome Period may provide little or no ability to realize investment returns if the Fund's net asset value has increased in value to a level near or above the Cap. In this circumstance, a purchaser of shares of the Fund at that price would still be vulnerable to risk of loss but will have little or no opportunity for gain. Purchasing shares after the beginning of the Outcome Period may also provide no benefit from the Buffer if shares are held for the entire Outcome Period, the Fund may not successfully achieve the Defined Outcomes, and there is no guarantee the Buffer will limit Fund losses as intended or that participation up to the Cap will be achieved. The Buffer is not guaranteed and may not be achieved. You therefore should not purchase shares after the first Outcome Period, or redeem shares prior to the last day of the Outcome Period, without understanding fully the consequences of doing so. Consult with your financial advisor. The Fund's website, [invesco.com](https://www.invesco.com), provides important Fund information on a daily basis with regard to the Cap and Buffer, current Outcome Period status and information relating to the remaining potential outcome investment in the Fund. Investors considering purchasing shares should visit the website for the latest information.

The Fund may be considered a "non-diversified" fund, as defined in the Investment Company Act of 1940 (1940 Act), solely as a result of a change in market capitalization or index weighting of one or more constituent securities. As a "non-diversified" fund, the Fund can invest a greater percentage of its assets are tied to a small group of issuers than a diversified fund can. Shareholder approval will not be required when the Fund crosses from diversified to non-diversified status due to a change in the relative market capitalization or index weightings of the more constituents of the Underlying Index. As of April 1, 2023, the Fund's investments are non-diversified, and therefore as of that same date, the Fund will be managed as non-diversified in accordance with the Underlying Index.

#### Principal Risks of Investing in the Fund

As with any mutual fund investment, loss of money is a risk of investment in the Fund is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any governmental agency. The risks associated with an investment in the Fund can increase during times of significant market volatility. The principal risks of investing in the Fund are:

**Market Risk**—The market values of the Fund's investments, and therefore the value of the Fund's shares, will go up and down, sometimes rapidly or unpredictably. The value of the Underlying Index may be affected by a number of factors, including general market conditions, such as real perceived adverse economic conditions, changes in the general economic environment or corporate earnings, changes in interest or currency rates, changes in expectations about inflation, regional or global instability, natural or environmental disasters, widespread disease or other public health events, war, military conflict, acts of terrorism, economic crisis or adverse market sentiment generally. Such circumstances may impact the ability of the Fund's Adviser to effectively implement the Fund's investment strategy. The Fund's investment strategy may include the use of options contracts on the Underlying Index, which will constitute the substantial portion of the Fund's portfolio, may at times be more volatile than the Underlying Index. Consequently, the value of the Fund's shares will be impacted by the price volatility of both the Underlying Index and options contracts on the Underlying Index.

**Buffered Loss Risk** The term "buffer" is a generic term that is widely used in the investment management and financial services industries to describe an investment product or strategy that mitigates or alleviates

concentrating its investments in an industry or industry group, the Fund may face more risks than if it were diversified broadly over numerous industries or industry groups. Such industry-based risks, any of which may adversely affect the companies in the Underlying Index, may include, but are not limited to, the following: general economic conditions or cyclical market patterns that could negatively affect supply and demand in a particular industry; competition for resources; adverse labor relations; political or world events; obsolescence of technologies; and increased competition or new product introductions that may affect the profitability or viability of companies in an industry. In addition, at times, such industry or industry group may be out of favor and underperform other industries or the market as a whole.

**Technology Sector Risk** Technology companies are subject to intense competition, rapid obsolescence of their products, issues with obtaining financing or regulatory approvals, product incompatibility, changing consumer preferences, increased government scrutiny, high required corporate capital expenditure for research and development or infrastructure and development of new products, each of which make the prices of securities issued by these companies more volatile. Technology companies are also heavily dependent on patent and other intellectual property rights, and the loss or impairment of these rights may adversely affect the company's profitability.

**Non-Diversification Risk** Under the Investment Company Act of 1940 (1940 Act), a fund designated as "diversified" must limit its holdings such that the securities of issuers which individually represent more than 5% of its total assets must in the aggregate represent less than 25% of its total assets. The Fund is classified as "diversified" for purposes of the 1940 Act. However, the Fund may be "non-diversified," as defined in the 1940 Act, solely as a result of a change in relative market capitalization or index weighting of one or more constituents of the Underlying Index. A non-diversified fund can invest such that a greater portion of its assets are tied to the securities of a small number of issuers or any single issuer than a diversified fund can. In such circumstances, a change in the value of one or a few issuers' securities will therefore affect the value of the Fund more

caused by the release of information about the company's financial performance.

## Purchase and Sale of Fund Shares

You cannot purchase or sell (redeem) shares of the Fund directly. Please contact the insurance company that issued your variable product for more information on the purchase and sale of Fund shares. For more information, see "Other Information—Purchase and Redemption of Shares" in this prospectus.

## Tax Information

The Fund expects, based on its investment objective and strategies, that its distributions, if any, will consist of ordinary income, capital gains, or some combination of both. Because shares of the Fund must be purchased through variable products, such distributions will be exempt from current taxation if left to accumulate within the variable product. Consult your variable insurance contract prospectus for additional tax information.

## Payments to Insurance Companies

If you purchase the Fund through an insurance company or other financial intermediary, the Fund, the Fund's distributor or its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the insurance company or other intermediary and your salesperson or financial adviser to recommend the Fund over another investment. Ask your salesperson or financial adviser or visit your financial intermediary's website for more information.

## Investment Objective(s), Strategies, Risks and Portfolio Holdings

### Objective(s) and Strategies

The Fund seeks, over a specified annual outcome period, to provide investors with returns that match those of the Nasdaq-100 Index (the "Underlying Index") up to an upside cap, while providing a buffer against the

first 10% (prior to taking into account any fees and expenses of the Fund) of Underlying Index losses. Although the Fund seeks to achieve its investment objective, there is no guarantee that it will do so. The Fund's investment objective may be changed by the Board of Trustees without shareholder approval.

The Fund invests, under normal circumstances, at least 80% its net assets (plus any borrowings for investment purposes) in options that reference the Underlying Index or options that reference the Invesco QQQ Trust, which is an exchange-traded unit investment trust that seeks to track the Nasdaq-100 Index (the "Underlying Fund"). References throughout this Prospectus to options that reference the "Underlying Index" mean either the Underlying Index or the Underlying Fund unless otherwise indicated. The Underlying Index includes securities of 100 of the largest domestic and international non-financial companies listed on The Nasdaq Stock Market LLC based on market capitalization. The options used by the Fund will include conventional, exchange-traded (listed) put and call options on the Underlying Index and Flexible Exchange Options ("Flex Options"), which are customizable options contracts. An option is a contract that gives the purchaser of the option, in return for the premium paid, the right, but not the obligation, to buy from (in the case of a call option) or sell to (in the case of a put option) the writer of the option at the exercise price during the term of the option (for American style options) or on a specified date (for European style options), the security, currency or other instrument underlying the option (or to receive payment of a cash settlement amount, in the case of cash-settled options, such as index options). Both the conventional, listed put and call options and the Flex Options on the Underlying Index purchased and sold by the Fund are cleared by the Options Clearing Corporation ("OCC"), a market clearinghouse, through a clearing member selected by the Fund. Flex Options allow the Fund to specify key contract terms, including exercise prices and expiration dates, that are not available for contracts traded in the conventional, listed options market. Flex Options purchased and sold by the Fund are set to expire on the last day of the Outcome Period, at which time the Fund will invest in a new set of Flex Options for the next Outcome Period.

The Underlying Index is a price return index, which captures only the capital appreciation or depreciation component of the issuers included in the Underlying Index and not any associated dividend payments paid by those issuers. The Fund, and therefore investors in the Fund, will not receive the benefit of such dividends.

The Fund employs a "Defined Outcome" strategy, which seeks to replicate the performance of the Underlying Index over a designated period of one year (the "Outcome Period") up to a predetermined cap (the "Cap"), while providing a buffer against the first 10% of Underlying Index losses over the Outcome Period (the "Buffer"). Following the conclusion of the Outcome Period, each subsequent Outcome Period will be a one-year period that begins on the trading day that immediately follows the day that the preceding Outcome Period concluded. A new Cap level will be determined at the end of the trading day immediately preceding the first day of each new Outcome Period and will change depending on market conditions. The Buffer for each Outcome Period will be 10%. The Fund's Cap represents the maximum percentage return, expressed as a percentage of the value of the Underlying Index determined at the start of the relevant Outcome Period (the "Underlying Index Start Value"), that can be achieved from an investment in the Fund over an Outcome Period, prior to taking into account any fees and expenses of the Fund. The Fund's Buffer represents the amount of losses, expressed as a percentage of the Underlying Index Start Value, that the Fund will buffer against if the Underlying Index experiences losses over an Outcome Period, prior to taking into account any fees and expenses of the Fund. Underlying Index losses over an Outcome Period that exceed the Buffer will be borne by shareholders. **As a result, you should expect that, if the Nasdaq-100 Index experiences losses of more than 10% over the relevant Outcome Period, you will bear all such losses on a one-to-one basis.**

The Fund has characteristics unlike many other traditional investment products and is not appropriate for all investors. In particular, investment in the Fund may not be appropriate for investors who do not intend to maintain their investment through the entire Outcome Period. There is no guarantee that the Fund will be able to achieve the stated Defined Outcomes.

As of the date of this prospectus, the Defined Outcomes sought by the Fund are based upon the performance of the Underlying Index over the Outcome Period of October 1, 2022 through September 30, 2023. The Fund's current Cap is set at 26.70%. Following this Outcome Period, each subsequent Outcome Period will be a twelve-month period from October 1 to September 30. The Fund is not intended to terminate after the end of any Outcome Period. After the end of each Outcome Period, another will begin. A new Cap level for each successive Outcome Period will be determined at the end of the trading day immediately preceding the first day of each new Outcome Period. Although the Buffer for each Outcome Period will be 10% (prior to taking into account any Fund fees and expenses), the Cap level may rise or fall from one Outcome Period to the next. The Outcome Period start date and end date, the Underlying Index Start Value and the Cap for subsequent Outcome Periods will be disclosed in a supplement to the Fund's summary prospectus and prospectus on the Fund's website. **There is no guarantee that the Defined Outcome strategy for an Outcome Period will be realized.**

The Cap for each Outcome Period is set at the end of the trading day immediately preceding the first day of that Outcome Period, is expressed as a percentage of the Underlying Index Start Value, and represents the maximum return that can be achieved by investing in the Fund over the Outcome Period (prior to taking into account any fees and expenses of the Fund). The Cap level is based on market conditions and other factors. The market conditions and other factors that influence the Cap can include market volatility, risk free rates, and time to expiration. If the performance of the Underlying Index over the Outcome Period equals or exceeds the Cap, the Fund seeks to provide an investment return equal to the Cap (less Fund fees and expenses). If the Underlying Index performance is positive but less than the Cap, the Fund seeks to provide an investment return equal to the Underlying Index performance (less Fund fees and expenses).

The Buffer for each Outcome Period will be 10% and represents the amount of losses, expressed as a percentage of the Underlying Index Start Value, that the Fund seeks to protect investors from if the Underlying Index experiences losses over the Outcome Period (prior to taking into account any fees and expenses of the Fund). If the Underlying Index performance over an Outcome Period is negative and such losses over the Outcome Period are at or less than the Buffer, the Fund seeks to provide a return of 0%, less Fund fees and expenses. If the Underlying Index performance over an Outcome Period is negative and such losses exceed the Buffer, the Fund seeks to provide a loss that is less than the loss on the Underlying Index by the amount of the Buffer (less Fund fees and expenses). Stated differently, in this circumstance the Fund seeks to provide a return equal to the negative performance of the Underlying Index (less Fund fees and expenses) plus the Buffer. The Fund's Cap and Buffer amounts will, in effect, be reduced by the fees and expenses of the Fund.

The Fund's Defined Outcomes may only be realized by holding shares on the first day of the Outcome Period and continuing to hold shares through the last day of the Outcome Period. This means investors should hold or purchase shares prior to the beginning of the Outcome Period to achieve the intended results. The Fund's Defined Outcomes in respect of each Outcome Period are measured from the Fund's net asset value calculated at the end of the trading day immediately preceding the first day of that Outcome Period. Investors who purchase shares after the Outcome Period has begun or sell shares prior to the Outcome Period's conclusion may experience investment returns very different from those that the Fund seeks to provide. Investment returns may vary (in some cases substantially) from the returns

sought by the Fund's Defined Outcome strategy if shares are sared /F2.

sought when the Fund crosses from diversified to non-diversified status due solely to a change in the relative market capitalization or index weighting of one or more constituents of the Underlying Index. As of April 1, 2023, the Underlying Index is non-diversified, and therefore as of that same date, the Fund is managed as non-diversified in accordance with the Underlying Index.

The Fund's investments in the types of securities and other investments described in this prospectus vary from time to time, and, at any time, the Fund may not be invested in all of the types of securities and other investments described in this prospectus. The Fund may also invest in securities and other investments not described in this prospectus.

For more information, see "Description of the Funds and Their Investments and Risks" in the Fund's SAI.

## Risks

The principal risks of investing in the Fund are:

**Market Risk** The market values of the Fund's investments, and therefore the value of the Fund's shares, will go up and down, sometimes rapidly or unpredictably. The value of the Underlying Index may be volatile, may go up or down due to general market conditions, such as real or perceived adverse economic conditions, changes in the general outlook for revenues or corporate earnings, changes in interest or currency rates or expectations about inflation, regional or global instability, or adverse investor sentiment generally. Individual stock prices tend to go up and down more dramatically than those of certain other types of investments, such as bonds. The value of the Underlying Index may also go up or down due to factors that affect an individual issuer or a particular industry or sector, such as changes in production costs and competitive conditions within an industry. In addition, natural or environmental disasters, widespread disease or other public health issues, war, military conflict, acts of terrorism, economic crisis or other events may have a significant impact on the value of the Underlying Index, as well as the financial markets and global economy generally. Such circumstances may impact the ability of the Adviser to effectively implement the Fund's investment strategy. The value of options contracts on the Underlying Index, which will constitute the substantial portion of the Fund's portfolio, may at times be more volatile than the Underlying Index itself. **Consequently, the value of the Fund's shares will be impacted by the price volatility of both the Underlying Index and options contracts on the Underlying Index**

### ■ Market Disruption Risks Related to Russia-Ukraine Conflict

Following Russia's invasion of Ukraine in late February 2022, various countries, including the United States, as well as North Atlantic Treaty Organization (NATO) member countries and the European Union, issued broad-ranging economic sanctions against Russia. The war in Ukraine (and the potential for further sanctions in response to Russia's continued military activity) may escalate. These and other corresponding events, have had, and could continue to have, severe negative effects on regional and global economic and financial markets, including increased volatility, reduced liquidity, and overall uncertainty. The negative impacts may be particularly acute in certain sectors including, but not limited to, energy and financials. Russia may take additional countermeasures or retaliatory actions (including cyberattacks), which could exacerbate negative consequences on global financial markets. The duration of the conflict and corresponding sanctions and related events cannot be predicted. The foregoing may result in a negative impact on Fund performance and the value of an investment in the Fund, even beyond any direct investment exposure the Fund may have to Russian issuers or the adjoining geographic regions.

### ■ COVID-19

The "COVID-19" strain of coronavirus has resulted in instances of market closures and dislocations, extreme volatility, liquidity constraints and increased trading costs. Efforts to contain its spread have resulted in travel restrictions, disruptions of healthcare systems, business operations (including business closures) and

supply chains, layoffs, lower consumer demand and employee availability, and defaults and credit downgrades, among other significant economic impacts that have disrupted global economic activity across many industries. Such economic impacts may exacerbate other pre-existing political, social and economic risks locally or globally and cause general concern and uncertainty. The full economic impact and ongoing effects of COVID-19 (or other future epidemics or pandemics) at the macro-level and on individual businesses are unpredictable and may result in significant and prolonged effects on the Fund's performance.

**Buffered Loss Risk** The term "buffer" is a generic term that is widely used in the investment management and financial services industries to describe an investment product or strategy that mitigates or alleviates downside risk and, typically, caps returns on the upside. The Buffer here is designed to limit downside losses for shares purchased at the beginning and held un neo1 Tw7 individuae -1.1 TD04(tP thobp incrhsteenancial markega).C

after the Outcome Period begins and the Fund's net asset value has decreased to the Buffer level, there is no effective Buffer against further losses when purchasing at that time. If shares are purchased after the Outcome Period begins and the Fund's net asset value has increased, the Buffer will not protect against subsequent losses unless the Fund's net asset value decreases to its value at the start of the Outcome Period. Additionally, if the Outcome Period has begun and the Fund's net asset value has decreased since the start of the Outcome Period, a purchaser of shares of the Fund at that price may realize an investment return that is less than any subsequent positive return of the Underlying Index.

#### **Derivatives Risk**

Options, the liquidation of a large number of options may more significantly impact the price. A less liquid trading market may adversely impact the value of the Flex Options held by the Fund and the value of your investment.

**Non-Indexing Risk** Unlike many investment companies, the Fund does not utilize an investing strategy that seeks returns that correspond to the returns of the Underlying Index in all cases. The operation of the Cap and the Buffer are designed to provide holders of shares of the Fund over an Outcome Period with an investment return that differs from the return of the Underlying Index if the performance of the Underlying Index exceeds the Cap or is negative. Additionally, a shareholder who redeems shares before the conclusion of an Outcome Period is unlikely to realize returns that correspond to the performance of the Underlying Index since the start of the Outcome Period. **If you desire to achieve an investment return that equals the return on the Underlying Index in all cases, you should not buy shares of the Fund**

**Industry Concentration Risk** Following its methodology, the Underlying Index from time to time may be concentrated to a significant degree in securities of issuers operating in a single industry or group of industries. To the extent that the Underlying Index concentrates in the securities of issuers in a particular industry or group of industries, the Fund will also concentrate its investments to approximately the same extent. By concentrating its investments in an industry or group of industries, the Fund may face more risks than if it were diversified broadly over numerous industries or groups of industries. Such industry-based risks, any of which may adversely affect the companies in the Underlying Index, may include, but are not limited to legislative or regulatory changes, adverse market conditions and/or increased competition within the industry or group of industries. In addition, at times, such industry or group of industries may be out of favor and underperform other industries, groups of industries or the market as a whole.

**Technology Sector Risk** Technology companies are subject to intense competition and their products are at risk of rapid obsolescence, which make the prices of securities issued by these companies particularly volatile. Product obsolescence can result from rapid technological developments, frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. Factors that may also significantly affect the market value of securities of issuers in the technology sector include the failure to obtain, or delays in obtaining, financing or regulatory approvals, product incompatibility, changing consumer preferences, increased government scrutiny, high required corporate capital expenditure for research and development or infrastructure and development of new products. Technology companies are also heavily dependent on patent and other intellectual property rights, and the loss or impairment of these rights may adversely affect the company's profitability.

**Non-Diversification Risk** Under the 1940 Act, a fund designated as "diversified" must limit its holdings such that the securities of issuers which individually represent more than 5% of its total assets must in the aggregate represent less than 25% of its total assets. The Fund is classified as "diversified" for purposes of the 1940 Act. However, in seeking to track its Underlying Index, the Fund may be "non-diversified," as defined in the 1940 Act, solely as a result of a change in relative market capitalization or index weighting of one or more constituents of the Underlying Index. A non-diversified fund can invest such that a greater portion of its assets are tied to the obligations or securities of a small number of issuers or any single issuer than a diversified fund can. In such circumstances, a change in the value of one or a few issuers' securities will therefore affect the value of the Fund more than if it was a diversified fund.

**Non-Correlation Risk** The Fund's returns may not match the returns of the Underlying Index (that is, it may experience tracking error) for a number of reasons. In addition to the impact of the Cap and the Buffer on the Fund's returns as compared to the returns of the Underlying Index, the Fund incurs operating expenses not applicable to the Underlying Index. To the extent that the Fund has recently commenced operations and/or otherwise has a relatively small amount of assets, such operating expenses

could have a proportionally greater impact on the Fund. Additionally, subscription and redemption activity in the Fund may cause the Fund to experience tracking error. Investors purchasing or redeeming shares of the Fund will transact at the net asset value per share of the relevant Series of shares next computed after the Fund receives that investor's order. However, the Fund generally will not purchase or sell the relevant options contracts referencing the Underlying Index in response to investor subscriptions and redemptions on a particular business day until after the investor orders are received, and the price of those options contracts may have changed

# Fund Management

## The Adviser(s)

Invesco serves as the Fund's investment adviser. The Adviser manages the investment operations of the Fund as well as other investment portfolios that encompass a broad range of investment objectives, and has agreed to perform or arrange for the performance of the Fund's day-to-day management. The Adviser is located at 1331 Spring Street, N.W., Suite 2500, Atlanta, Georgia 30309. The Adviser, as successor in interest to multiple investment advisers, has been an investment adviser since 1976.

**Sub-Advisers.** Invesco Asset Management Limited (Invesco Asset Management) serves as the Fund's investment sub-adviser. Invesco Asset Management, an affiliate of the Adviser, is located at Perpetual Park, Perpetual Park Drive, Henley-on-Thames, Oxfordshire, RG9 1HH, United Kingdom. Invesco Asset Management has been managing assets on behalf of consumers, institutional clients and institutional professionals through a broad product range, including investment companies with variable capital, investment trusts, individual savings accounts, pension funds, offshore funds and other specialist mandates since 1969, the year Invesco Asset Management was incorporated. Invesco Asset Management provides portfolio management services to the Fund.

In addition, Invesco has entered into one or more Sub-Advisory Agreements with certain affiliates to serve as sub-advisers to the Fund (the Sub-Advisers). Invesco may appoint the Sub-Advisers from time to time to provide discretionary investment management services, investment advice, and/or order execution services to the Fund. The Sub-Advisers and the Sub-Advisory Agreements are described in the SAI.

## Exclusion of Adviser from Commodity Pool Operator Definition

With respect to the Fund, the Adviser has claimed an exclusion from the definition of "commodity pool operator" (CPO) under the Commodity Exchange Act (CEA) and the rules of the Commodity Futures Trading Commission (CFTC) and, therefore, is not subject to CFTC registration or regulation as a CPO. In addition, the Adviser is relying upon a related exclusion from the definition of "commodity trading advisor" (CTA) under the CEA and the rules of the CFTC with respect to the Fund.

The terms of the CPO exclusion require the Fund, among other things, to adhere to certain limits on its investments in "commodity interests." Commodity interests include commodity futures, commodity options and swaps, which in turn include non-deliverable forwards. The Fund is permitted to invest in these instruments as further described in the Fund's SAI. However, the Fund is not intended as a vehicle for trading in the commodity futures, commodity options or swaps markets. The CFTC has neither reviewed nor approved the Adviser's reliance on these exclusions, or the Fund, its investment strategies or this prospectus.

## Adviser Compensation

During the fiscal year ended December 31, 2022, the Adviser did not receive any compensation from the Fund, after fee waiver and/or expense reimbursement, if any.

Invesco, not the Fund, pays sub-advisory fees, if any.

A discussion regarding the basis for the Board's approval of the investment advisory agreement and investment sub-advisory agreements of the Fund is available in the Fund's most recent annual or semi-annual report to shareholders.

## Portfolio Managers

Investment management decisions for the Fund are made by the investment management teams at Invesco and Invesco Asset Management.

The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

- John Burrello, CFA, Portfolio Manager, who has been responsible for the Fund since 2023 and has been associated with Invesco and/or its affiliates since 2012.

- Ali Zouiten, Portfolio Manager, who has been responsible for the Fund since 2021 and has been associated with Invesco Asset Management and/or its affiliates since 2019. From 2017 to 2019, he was associated with HSBC Asset Management where he served as Head of Investments for Product Development. From 2011 to 2019, he was associated with Baloise Group in Switzerland, where he served as Specialist for Hedging and Financial Structures.

More information on the portfolio managers may be found at [www.invesco.com/us](http://www.invesco.com/us). The website is not part of this prospectus.

The Fund's SAI provides additional information about the portfolio managers' investments in the Fund, a description of the compensation structure and information regarding other accounts managed.

## Other Information

### Purchase and Redemption of Shares

The Fund ordinarily effects orders to purchase and redeem shares at the Fund's next computed net asset value (NAV) after it receives an order. Insurance companies participating in the Fund serve as the Fund's designee for receiving orders of separate accounts that invest in the Fund. The Fund may postpone the right of redemption only under unusual circumstances, as allowed by the SEC, such as when the New York Stock Exchange (NYSE) restricts or suspends trading.

Although the Fund generally intends to pay redemption proceeds solely in cash, the Fund reserves the right to determine, in its sole discretion, whether to satisfy redemption requests by making payment in securities or other property (known as a redemption in kind). Redemptions in kind may result in transaction costs and/or market fluctuations associated with liquidating or holding the securities, respectively.

Shares of the Fund are offered in connection with mixed and shared funding, i.e., to separate accounts of affiliated and unaffiliated insurance companies funding variable products. The Fund currently offers shares only to insurance company separate accounts and funds of funds. In the future, the Fund may offer them to pension and retirement plans that qualify for special federal income tax treatment. Due to differences in tax treatment and other considerations, the interests of Fund shareholders, including variable product owners and plan participants investing in the Fund (whether directly or indirectly through fund of funds), may conflict.

Mixed and shared funding may present certain conflicts of interest. For example, violation of the federal tax laws by one insurance company separate account investing directly or indirectly in a fund could cause variable products funded through another insurance company separate account to lose their tax-deferred status, unless remedial actions were taken. The Board will monitor for the existence of any material conflicts and determine what action, if any, should be taken. The Fund's NAV could decrease if it had to sell investment securities to pay redemption proceeds to a separate account (or plan) withdrawing because of a conflict.

### Redemptions by Large Shareholders

At times, the Fund may experience adverse effects when certain large shareholders redeem large amounts of shares of the Fund. Large redemptions may cause the Fund to sell portfolio securities at times when it would not otherwise do so. In addition, these transactions may also accelerate the realization of taxable income to shareholders (if applicable) if such sales of investments resulted in gains and may also increase transaction costs and/or increase in the Fund's expense ratio. When experiencing a redemption by a large shareholder, the Fund may delay payment of the redemption request up to seven days to provide the investment manager with time to determine if the Fund can redeem the request-in-kind or to consider other alternatives to lessen the harm to remaining shareholders. Under certain circumstances, however, the Fund may be unable to delay a redemption request, which could result in the automatic processing of a large redemption that is detrimental to the Fund and its remaining shareholders.

## **Excessive Short-Term Trading Activity Disclosure**

The Fund's investment programs are designed to serve long-term investors and are not designed to accommodate excessive short-term trading activity in violation of the Fund's policies and procedures described below.

Excessive short-term trading activity in the Fund's shares (i.e., purchases of Fund shares followed shortly thereafter by redemptions of such shares, or vice versa) may hurt the long-term performance of the Fund by requiring it to maintain an excessive amount of cash or to liquidate portfolio holdings at a disadvantageous time, thus interfering with the efficient management of the Fund by causing it to incur increased brokerage and administrative costs. Where excessive short-term trading activity seeks to take advantage of arbitrage opportunities from stale prices for portfolio securities, the value of Fund shares held by long-term investors may be diluted. The Board has adopted policies and procedures designed to discourage excessive short-term trading of Fund shares. The Fund may alter its policies and procedures at any time without giving prior notice to Fund shareholders if Invesco believes the change would be in the best interests of long-term investors.

Pursuant to the Fund's policies and procedures, Invesco and certain of its corporate affiliates (Invesco and such affiliates, collectively, the Invesco Affiliates) currently use the following tools designed to discourage excessive short-term trading in the Fund:

- (1) trade activity monitoring; and
- (2) the use of fair value pricing consistent with the valuation policy approved by the Board and related procedures.

Each of these tools is described in more detail below.

In addition, restrictions designed to discourage or curtail excessive short-term trading activity may be imposed by the insurance companies and/or their separate accounts that invest in the Fund on behalf of variable product owners. Variable product owners should refer to the applicable contract and related prospectus for more details.

## **Trade Activity Monitoring**

To detect excessive short-term trading activities, the Invesco and certain of

the Fund is holding fair-valued securities may receive a greater or lesser number of shares, or higher or lower redemption proceeds, than they would have received if the Fund had not fair-valued the security or had used a different methodology.

The Board has designated the Adviser to perform the daily determination of fair value prices in accordance with Board approved policies and related procedures, subject to the Board's oversight. Fair value pricing methods and pricing services can change from time to time.

The intended effect of applying fair value pricing is to compute a NAV that accurately reflects the value of the Fund's portfolio at the time that the NAV is calculated. An additional intended effect is to discourage those seeking to take advantage of arbitrage opportunities resulting from "stale" prices and to mitigate the dilutive impact of any such arbitrage. However, the application of fair value pricing cannot eliminate the possibility that arbitrage opportunities will exist.

Specific types of securities are valued as follows:

#### **Senior Secured Floating Rate Loans and Senior Secured Floating Rate Debt Securities**

Senior secured floating rate loans and senior secured floating rate debt securities are fair valued using evaluated quotes provided by an independent pricing service. Evaluated quotes provided by the pricing service may reflect appropriate factors such as market quotes, ratings, tranche type, industry, company performance, spread, individual trading characteristics, institution-size trading in similar groups of securities and other market data.

#### **Domestic Exchange Traded Equity Securities**

Quotations are generally available and reliable for domestic exchange traded equity securities. If market quotations are not available or are unreliable, the Adviser will value the security at fair value in good faith using the valuation policy approved by the Board and related procedures.

#### **Foreign Securities**

Market quotations are available and reliable for foreign exchange traded equity securities, the securities will be valued at the market quotations. Because trading hours for certain foreign securities end before the close of the NYSE, closing market quotations may become unreliable. If between the time trading ends on a particular security and the close of the customary trading session on the NYSE events occur that are significant and may make the closing price unreliable, the Fund may fair value the security. If an issuer specific event has occurred that the Adviser determines, in its judgment, is likely to have affected the closing price of a foreign security, it will price the security at fair value. The Adviser also relies on a screening process from a pricing vendor to indicate the degree of certainty, based on historical data, that the closing price in the principal market where a foreign security trades is not the current market value as of the close of the NYSE. For foreign securities where the Adviser believes, at the approved degree of certainty, that the price is not reflective of current market value, the Adviser will use the indication of fair value from the pricing service to determine the fair value of the security. The pricing vendor, pricing methodology or degree of certainty may change from time to time. Fund securities primarily traded on foreign markets may trade on days that are not business days of the Fund. Because the NAV of Fund shares is determined only on business days of the Fund, the value of foreign securities included in the Fund's portfolio may change on days when the separate account to which you have allocated variable product values will not be able to purchase or redeem shares of the Fund.

#### **Fixed Income Securities**

Income securities, such as government, corporate, asset-backed and municipal bonds and convertible securities, including high yield or junk bonds, and loans, generally are valued on the basis of prices provided by independent pricing services. Prices provided by the pricing services may be determined without exclusive reliance on quoted prices, and may reflect appropriate factors such as institution-size trading in similar groups of securities, developments related to special securities, dividend rate, maturity and other market data. Pricing services generally value fixed income securities assuming orderly transactions of institutional round lot size, but a Fund may hold or transact in the same securities in smaller, odd lot sizes. Odd lots often trade at lower prices than institutional

round lots. Prices received from pricing services are fair value prices. In addition, if the price provided by the pricing service and independent quoted prices are unreliable, the Adviser will fair value the security using the valuation policy approved by the Board and related procedures.

#### **Short-term Securities**

Fund's short-term investments are valued at amortized cost when the security has 60 days or less to maturity.

#### **Futures and Options**

Futures contracts are valued at the final settlement price set by the exchange on which they are principally traded. U.S. exchange-traded options are valued at the mean between the last bid and asked prices from the exchange on which they principally trade. Non-U.S. exchange-traded options are valued at the final settlement price set by the exchange on which they trade. Options not listed on an exchange and swaps generally are valued using pricing provided from independent pricing services.

#### **Swap Agreements**

Swap agreements are fair valued using an evaluated quote provided by an independent pricing service. Evaluated quotes from the pricing service are based on a model that may include end of day net present values, spreads, ratings, industry and company performance.

#### **Open-end Funds**

If the Fund invests in other open-end funds, other than open-end funds that are exchange traded, the investing Fund will calculate its NAV using the NAV of the underlying fund in which it invests. The Fund discloses portfolio holdings at different times to insurance companies issuing variable products that invest in the Fund, and in annual and semi-annual shareholder reports. Refer to such reports to determine the types of securities in which the Fund has invested. You may also refer to the SAI to determine what types of securities in which the Fund may invest. You may obtain copies of these reports or of the SAI from the insurance company that issued your variable product, or from the Adviser as described on the back cover of this prospectus.

The Fund generally determines the net asset value of its shares on each day the NYSE is open for trading (a business day) as of approximately 4:00 p.m. Eastern Time (the customary close of regular trading) or earlier in the case of a scheduled early close. In the event of an unscheduled early close of the NYSE, the Fund generally still will determine the net asset value of its shares as of 4:00 p.m. Eastern Time on that business day. Portfolio securities traded on the NYSE would be valued at their closing prices unless the Adviser determines that a "fair value" adjustment is appropriate due to subsequent events occurring after an early close consistent with the valuation policy approved by the Board and related procedures.

#### **Taxes**

The Fund intends to qualify each year as a regulated investment company and, as such, is not subject to entity-level tax on the income and gain it distributes to shareholders. Insurance company separate accounts may invest in the Fund and, in turn, may offer variable products to investors through insurance contracts. Because the insurance company separate accounts generally are the shareholders in the Fund, all of the tax characteristics of the Fund's investments flow into the separate accounts and not to each variable product owner. The tax consequences from each variable product owner's investment in a variable product contract will depend upon the provisions of these contracts, and variable product owners should consult their contract prospectus for more information on these tax consequences.

#### **Dividends and Distributions**

The Fund expects, based on its investment objective and strategies, that its distributions, if any, will consist of ordinary income, capital gains, or some combination of both.

#### **Dividends**

The Fund generally declares and pays dividends from net investment income, if any, annually.

## Capital Gains Distributions

The Fund generally distributes long-term and short-term capital gains (net of any available capital loss carryovers), if any, at least annually. Capital gains distributions may vary considerably from year to year as a result of the Fund's normal investment activities and cash flows.

## Share Classes

The Fund has two classes of shares, Series I shares and Series II shares. Each class is identical except that Series II shares have a distribution or "Rule 12b-1 Plan" that is described below.

## Distribution Plan

The Fund has adopted a distribution or "Rule 12b-1 Plan" for its Series II shares. The plan allows the Fund to pay distribution fees to life insurance companies and others to promote the sale and distribution of Series II shares. The plan provides for a maximum fee equal to an annual rate of 0.25% (expressed as a percentage of average daily net assets of the Fund). Because the Fund pays these fees out of its assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of charges.

## Payments to Insurance Companies

The insurance company that issued your variable product, or one of its affiliates, may receive all the Rule 12b-1 distribution fees discussed above. In addition to those payments, Invesco Distributors, Inc., the distributor of the Fund and an Invesco Affiliate, and other Invesco Affiliates may make cash payments to the insurance company that issued your variable product or the insurance company's affiliates in connection with promotion of the Fund and certain other marketing support services. Invesco Affiliates make these payments from their own resources. Invesco Affiliates make these payments as incentives to certain insurance companies or their affiliates to promote the sale and retention of shares of the Fund. The benefits Invesco Affiliates receive when they make these payments may include, among other things, adding the Fund to the list of underlying investment options in the insurance company's variable products, and access (in some cases on a preferential basis over other competitors) to individual members of an insurance company's sales force or to an insurance company's management. These payments are sometimes referred to as "shelf space" payments because the payments compensate the insurance company for including the Fund in its variable products (on its "sales shelf"). Invesco Affiliates may also make payments to insurance company affiliates for support, training and ongoing education for sales personnel about the Fund, financial planning needs of Fund shareholders or contract owners that allocate contract value directly or indirectly to the Fund, marketing and advertising of the Fund, and access to periodic conferences held by insurance company affiliates relating directly or indirectly to the Fund. Invesco Affiliates compensate insurance companies or their affiliates differently depending typically on the Fund's position for sales personnel at the insurance company.

Invesco Affiliates compensate insurance companies or their affiliates differently depending typically on the Fund's position for sales personnel at the insurance company.

Invesco Affiliates compensate insurance companies or their affiliates differently depending typically on the Fund's position for sales personnel at the insurance company.

OTHER PERSON OR ENTITY FROM THE USE OF THE UNDERLYING INDEX OR ANY DATA INCLUDED THEREIN. THE CORPORATIONS MAKE NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE UNDERLYING INDEX OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL THE CORPORATIONS HAVE ANY LIABILITY FOR ANY LOST PROFITS OR SPECIAL, INCIDENTAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES, EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

# Financial Highlights

The financial highlights show the Fund's financial history for the past five fiscal years or, if shorter, the period of operations of the Fund or any of its share classes. The financial highlights table is intended to help you understand the Fund's financial performance. Certain information reflects financial results for a single Fund share.

The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions).

This information has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, whose report, along with the Fund's financial statements, is included in the Fund's annual report, which is available upon request.

---

Net asset value, beginning of period	Net investment income (loss) <sup>(a)</sup>	Net gains (losses) on securities (both realized and unrealized)	Total from investment operations

## Obtaining Additional Information

More information may be obtained free of charge upon request. The SAI, a current version of which is on file with the SEC, contains more details about the Fund and is incorporated by reference into this prospectus (is legally a part of this prospectus). Annual and semi-annual reports to shareholders contain additional information about the Fund's investments. The Fund's annual report also discusses the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year. The Fund also files its complete schedule of portfolio holdings with the SEC for the 1st and 3rd quarters of each fiscal year as an exhibit to its reports on Form N-PORT. The Fund's most recent portfolio holdings, as filed on Form N-PORT, will also be made available to insurance companies issuing variable products that invest in the Fund.

If you have questions about an Invesco Fund, or you wish to obtain a free copy of the Fund's current SAI, annual or semi-annual reports, or Form N-PORT, please contact the insurance company that issued your variable product, or you may contact us.
